“ From kindergarten when I kissed you in the aisle on the bus (because you dated me to), through middle school when we had each other's backs while still figuring out who we were, to early high school when we ran in the same crowd again... You were there for me and I was there for you. Later, we lost touch an regained it many times through the years. I'm forever grateful for all the times we were I touch and ha each other's backs. I love you forever, Shawnte.
